examining the changing pluralities of contemporary abortion debate in Britain this innovative and important book shows why it is necessary to move beyond an understanding of abortion

politics as characterised in binary terms by pro choice versus pro life amery traces the evolution of political and parliamentary discourses from the passage of the abortion act in the 1960s to the present day and argues that the current provision of abortion in britain rests on assumptions about medical authority over women s reproductive decision making which are unsustainable she explores new arguments around sex selective abortion disability rights pre abortion counselling and the push for decriminalization and radically reconceptualizes the debate to account for these new battlegrounds in abortion politics

the british described themselves as e the oldest friend e of the ottomans but this was never true at times it was valuable to britain to support the ottoman empire against russian encroachment however by the end of the 19th century successive british governments had begun to sponsor the dismemberment of the empire british public opinion and political pressure groups portrayed the ottomans in universally defamatory terms affecting the diplomatic actions of politicians politicians themselves harbored deep prejudices against the turks and islam the result through numerous incidents was british pressure to dismember the ottoman empire treaty provisions guaranteeing ottoman territorial integrity were ignored christian countries and christian minorities were supported even when muslims in those countries were being killed and forced from their lands british leaders even refused to publish consular reports that described the oppression of muslims which would have given the lie to press reports of evil turks drawing upon decades of archival research justin mccarthy shows how the british were anything but friends to the ottomans

the untold story of how winston churchill and the conservative party envisioned britain s post war future we think we know all there is to know about britain s second world war we don t this radical re interpretation of british history and british conservatism between 1939 and 1945 reveals the bold at times utopian plans british conservatives drew up for britain and the post war world from proposals for world government to a more united empire via dreams of a new christian elite and a move back to the land blue jerusalem reveals how conservatives were every bit as imaginative and courageous as their labour and left wing opponents in their wartime plans for a post war world bringing these alternative visions of britain s post war future back to life blue jerusalem restores politics to the centre of the story of britain s war it demonstrates how everything from the weapons britain fought with to the theatres in which the fighting took place and the allies britain chose were the product of political decisions about the different futures conservatives wanted to make rejecting notions of a people s war that continue to cloud how we think of world war ii it explores how the Tories

used their control of the home and battle front to fight a deeply conservative war and build the martial imperial and christian nation of which many of a conservative disposition had long dreamed a study of political thinking as well as political manoeuvre blue jerusalem goes beyond an examination of the usual suspects such as winston churchill and neville chamberlain to reveal a hitherto lost world of british conservatism and a set of forgotten futures that continue to shape our world
