throughout the ages architects have attempted to capture the essence of living systems as
design inspiration however practitioners of the built environment have had to deal with a
fundamental split between the artificial urban landscape and nature owing to a technological
gap that means architects have been unable to make effective use of biological systems in
urban environments protocell architecture is an edition of ad that shows for the first time that
contemporary architects can create and construct architectures that are bottom up
synthetically biological green and have no recourse to shallow bio mimicry in the next few
decades synthetic biology is set to have as much if not more impact on architecture as
cyberspace and the digital the key to these amazing architectural innovations is the protocell
