this book develops and articulates a new perspective on the relationship between natural resources and development by foregrounding issues of innovation knowledge and industrial dynamics despite growing academic attention to the relationship between economic development and natural resources in social sciences the issue has received rather limited attention in the field of innovation studies this is problematic given the centrality of innovation and technological change for growth and development against that background this book makes three contributions firstly it summarizes and synthesizes existing insights about learning and innovation in natural resource based industries secondly it develops new insights based on original research work thirdly it distils and explains the remaining research

challenges in the field containing important insights for researchers businesses and policymakers this book will be useful to all those with an interest in navigating a natural resource based development pathway this book was originally published as a special issue of innovation and development

this book offers a holistic model for what it calls innovation leadership which includes entrepreneurial action creative energy fields within organizations high tech wealth creation and innovation as a business process

an executive guide for deploying innovation in the past innovation has been considered an art dependent upon the people who make it happen and a relatively rare unpredictable occurrence as a result too much time is taken in the development of new products and services in the 21st century we must change this process so that we become continual thinkers capable of innovating on demand for mass customization this requires that we understand innovation better and standardize the process for predictable results history shows that innovation is evolutionary and is a response to an unsolved problem or unexploited opportunity which makes praveen gupta s business innovation in the 21st century a valuable addition to the literature his 25 years of business problem solving have given him the tools to develop a plausible framework that directs us to look at innovation in a different context several books have been written addressing various aspects of innovation but common understanding has been limited to the level of brainstorming and creative tools this book presents a comprehensive approach to the innovation process this is one of the first books for executives that address various aspects of innovation from concepts to commercialization the purpose of this book is to provide comprehensive coverage of innovation related processes and a new framework that are suitable for the internet generation and the knowledge age the goal of developing such a framework is to facilitate standardization of the innovation process so that results can be more predictable and so that innovation can be produced on demand the book
