this book addresses the issue of intangibles contribution to growth at macroeconomic and microeconomic levels it provides a review of a set of new approaches to innovation growth it also considers the issue of how to invest in intangibles especially with regard to the market failure issue the book focusses on three major themes first it provides a better understanding of how intangibles contribute to economic growth and value creation in a second part it presents emerging practices as well as examples of market failure analyzing managerial practices in relationship to market imperfections finally the book links the value of intangibles with innovation and the performance of firms

this book argues that the neoclassical synthesis is insufficiently attentive to the impact of the stock market on the economy smithers proposes an alternative model which

takes into account the differing preferences of business managers and owners of capital

this volume examines the macrodynamic behaviour of advanced economies with social institutions similar to those of the united states and other members of the organization of economic cooperation and development it is a critique of and provides alternative models to conventional neoclassical theory the principles developed are used to explain two major phenomena in economic life the nation s secular growth rate and the cyclical deviations around that growth these interdependent movements of trend and cycle constitute the economy s macrodynamic behaviour eichner uses a systems framework for integrating four distinct institutional dimensions in society the normative the political the economic and the anthropogenic this book by one of the leading proponents of post keynesian economics is the culmination of over 13 years of scholarly work the author s untimely death in february 1988 prevented the final revisions of his manuscript the book should prove an essential addition to the library of scholars and students of economics both within and outside the post keynesian tradition

since the 1980s the united states has regressed to a level of economic inequality not seen since the gilded age in the late nineteenth century at the same time technological innovation has transformed society and a core priority of public policy has been promoting innovation what is the relationship between economic inequality and technological change mordecai kurz develops a comprehensive integrated theory of the dynamics of market power and income inequality he shows that technological innovations are not simply sources of growth and progress they sow the seeds of market power in a free market economy with intellectual property rights firms control over technology enables them to expand attain monopoly power and earn exorbitant profits competition among innovators does not eliminate market power because technological competition is different from standard competition it results in only one or two winners kurz provides a pioneering analysis grounded on quantifying technological market power and its effects on inequality innovation and economic growth he outlines what causes market power to rise and fall and details its macroeconomic and distributional consequences kurz demonstrates that technological market power tends to rise increasing inequality of income and wealth unchecked inequality threatens the foundations of democracy public policy is the only counterbalancing force that can restrain corporate power attain more egalitarian distribution of wealth and make democracy compatible with capitalism presenting a new paradigm for understanding today s vast inequalities this book offers detailed proposals to redress them by restricting corporate mergers and acquisitions reforming patent law improving the balance of power in the labor market increasing taxation promoting upward mobility and stabilizing the middle class

apr issues for 1940 42 include papers and proceedings of the semi annual dec meeting of the american marketing association 1939 41

this volume brings together an international group of contributors to explore the impacts of structural economic change and technological progress on labor markets the contributors goal is to present an in depth comparative study of the ways in which different national economies have adjusted to structural changes like the shift to service based economies and technological changes brought about by the increasing use of the computer in offices and on the production line examining the adjustment process from both a micro and macro perspective the contributors analyze the flexibility potentials within the different institutional organizations of the labor market in the u s france west germany great britain and sweden the study begins with a comprehensive introduction written by the editors which discusses the problem of structural and technological change in economic social and political terms two subsequent chapters address the economic structures of post industrial society and the differential characteristics of employment growth in service industries the contributors then present individual analyses of the labor market situation in the five countries under study as well as two general studies of institutions regulating the labor market and flexibility within the labor market throughout the contributors are concerned with key issues such as which systems seem to adapt best how skill and educational needs may be met in the changing labor market and the importance of flexibility in a system characterized by ongoing structural and technological change ideal as supplementary reading for advanced courses in labor economics and industrial organization this volume offers important new insights into labor market flexibility in the face of significant and continuing change
