this major inter disciplinary collection is edited by two of the best respected figures in the field and provides a superb general introduction to the analysis of qualitative data for all students

offering a detailed introduction to the practice of data analysis this book is both user friendly and theoretically grounded drawing on his extensive experience of qualitative research douglas ezzy reviews approaches to data analysis in established research traditions including ethnography phenomenology and symbolic interactionism alongside the newer approaches informed by cultural studies and feminism he explains the difference between inductive deductive and abductive theory building provides a guide to computer assisted analysis and outlines techniques such as journal writing team meetings and participant reviews this text is one of the first to treat computer assisted data analysis as an integral part of qualitative research exceptionally well written this is a valuable reference for research students and professional researchers in the social sciences and health

this unique text provides a broad introduction to qualitative analysis together with concrete demonstrations and comparisons of five major approaches leading scholars apply

their respective analytic lenses to a narrative account and interview featuring teresa a young opera singer who experienced a career changing illness the resulting analyses vividly exemplify what each approach looks like in action the researchers then probe the similarities and differences among their approaches their distinctive purposes and strengths the role style and subjectivity of the individual researcher and the scientific and ethical complexities of conducting qualitative research also included are the research participant s responses to each analysis of her experience a narrative account from another research participant gail can be used by readers to practice the kinds of analysis explored in the book

in this fully updated and expanded second edition carol grbich provides a guide through current issues in the analysis of qualitative data packed with detailed examples a glossary further reading lists and a section on writing up this book is exactly what you need to get you started in qualitative research the new edition covers analytical approaches including grounded theory classical existential and hermeneutic phenomenology feminist research including memory work classical auto and cyberethnography as well as ethnodrama content narrative conversation and discourse analysis visual interpretation semiotic structural and poststructural analyses a one stop shop for students new to qualitative data analysis

introducing eight analytical approaches that are key to successful social science research this book helps you get to grips with theory and apply it to qualitative analysis with two matched chapters dedicated to each approach it provides a balance between theory and analytical method the first chapter grounds the approach in theory and the second uses real world examples to show how to conduct your own analysis using the approach drawing on the contributing authors wealth of experience the book highlights how analysis relates to the entire research process and helps you position your analysis within the larger context of your research provides a strong theoretical foundation for building good qualitative analysis guides you through translating theory into real world practice in your own research detailed clear and accessible this book is perfect for students who want to understand the theory behind qualitative analysis before conducting their own research or develop their understanding of specific approaches

balancing theoretical foundations with practical strategies this book helps you develop an approach to your qualitative analysis that is both systematic and insightful it demonstrates the importance of tying analysis into every aspect of research from design through data collection and management to writing up and provides step by step guidance on how to embed analysis from start to finish grounded in the reality of doing research this second edition presents visual and text based methods for analysis using manual and digital tools inspires confidence as you code connect and interrogate observational text and visual data showcases best practice and helps you navigate real life dilemmas using case studies of research from across the social sciences together with rich online resources including videos datasets and journal articles this is an important new edition for all students undertaking qualitative research with a focus on analysis and design

the teaching of qualitative analysis in the social sciences is rarely undertaken in a structured way this handbook is designed to remedy that and to present students and researchers with a systematic method for interpreting qualitative data whether derived from interviews field notes or documentary materials the special emphasis of the book is on how to develop theory through qualitative analysis the reader is provided with the tools for doing qualitative analysis such as codes memos memo sequences theoretical sampling and comparative analysis and diagrams all of which are abundantly illustrated by actual examples drawn from the author s own varied qualitative research and research consultations as well as from his research seminars many of the procedural discussions are concluded with rules of thumb that can usefully guide the researchers analytic operations the difficulties that beginners encounter when doing qualitative analysis and the kinds of persistent questions they raise are also discussed as is the problem of how to integrate analyses in addition there is a chapter on the teaching of qualitative analysis and the giving of useful advice during research consultations and there is a

discussion of the preparation of material for publication the book has been written not only for sociologists but for all researchers in the social sciences and in such fields as education public health nursing and administration who employ qualitative methods in their work

a great basic book which can be used by the novice qualitative researcher the advice is friendly almost folksy with clear conceptual explanation of how the program works a very welcome contribution to this field martha ann carey albert einstein college of medicine new york qualitative researchers continue to be criticized because they rely too much on their own interpretations and avoid analytical and theoretical issues this book provides ways to integrate the thinking about a project and the data you have with practical ways that the software can facilitate the process i recommend it for both the new user as well as the experienced one marilyn lichtman forum for qualitative social research follow the link below to read the complete review this book invites readers to learn how to use qualitative data analysis software in the context of doing their research project the reader follows basic steps for creating and conducting a real project with real data using the new generation software package qsr nvivo the software tools are introduced only as needed and explained in the framework of what is being asked the reader is the craftsperson trialling those tools in the processes of getting started tentative interpretation drawing links shaping data and seeking and establishing explanations and theories the nvivo qualitative project book allows the researcher to work through their own project or work with data provided from a real project the authors draw on decades of experience of research and training researchers around the world and take the reader through each step in a style combining informality and authority with frequent tips and reflections on what is being done demonstration software is provided on the enclosed cd rom with data to help create a researcher s project a project about researchers and researching and with multiple stages arranged sequentially in the development of a real project as a practical tool to help researchers understand qualitative data analysis software using nvivo and a guide through the sometimes complex processes of doing a research project this book will be invaluable reading for researchers and students undertaking qualitative research pat bazeley provides training and consulting services in research design and data analysis through her company research support lyn richards is director of research services at qualitative solutions and research the developers of nud ist and nvivo software nvivo is distributed by scolari sage publications software

how do scholars transform qualitative data into analysis what does making analysis imply what happens in the space in between data and finalized analysis is notoriously difficult to talk about in other parts of the research process scholars and students are aided by method books that describe the technicalities of generating processing and sorting through data handbooks that teach academic writing and scholarly works that offer meta level theoretical perspectives yet the path from qualitative data to analysis remains a black box qualitative analysis in the making ventures into this black box the volume provides a means of speaking about how analyses emerge in the humanities contributors from disciplines such as anthropology history and sociology of religion all employ an analytical double take they revisit one of their analyses analyzing how this particular analysis came into being such analyses of an analysis are neither confessions nor step by step recounts of what happened rather the volume argues that speaking of the space in between requires analytical displacement and the employment of fresh analytical takes this approach contributes to demystifying the path from qualitative data to finalized analysis it invites novel epistemological reflections among scholars and assists students in improving their analytical skills

this text provides examples of how different psychologists have used qualitative analysis in research each chapter is based around a real piece of research and the researcher discusses exactly how they went about conducting the analysis
