what better introduction to the world of philosophy than through the lives of its most prominent citizens in the philosophers we are introduced to twenty eight of the greatest thinkers in western civilization ranging from aristotle and plato to wittgenstein heidegger and sartre an illustrious team of scholars takes us on a concise and illuminating tour of some of the most brilliant minds and enduring ideas in history here is aristotle s nichomachean ethics plato s cave of shadows schopenhauer s vision of reality as blind striving will hegel s idea of the world spirit bentham s principle of the greatest happiness mill s contributions to our understanding of liberty william james s theory of the stream of consciousness husserl s phenomenology and much more readers will find thoughtful discussions of everything from kant s categorical imperative to the christian philosophies of

augustine aquinas and kierkegaard to the materialism of hobbes or marx to the modern and quite different philosophical systems of bertrand russell jean paul sartre and ludwig wittgenstein each article is illustrated with a portrait of the philosopher the contributors provide lists for further reading and the volume includes a chronological table that gives valuable historical context here then is an authoritative and engaging guide to the ideas of the most notable philosophers ranging from antiquity to the present day the philosophers shows how these great thinkers wrestled with the central problems of the human condition with important questions of free will morality and the limits of logic and reason as it illuminates their legacy for our time

how the role of the philosopher has changed over time and across cultures and what it reveals about philosophy today what would the global history of philosophy look like if it were told not as a story of ideas but as a series of job descriptions ones that might have been used to fill the position of philosopher at different times and places over the past 2 500 years the philosopher does just that providing a new way of looking at the history of philosophy by bringing to life six kinds of figures who have occupied the role of philosopher in a wide range of societies around the world over the millennia the natural philosopher the sage the gadfly the ascetic the mandarin and the courtier the result is at once an unconventional introduction to the global history of philosophy and an original exploration of what philosophy has been and perhaps could be again by uncovering forgotten or neglected philosophical job descriptions the book reveals that philosophy is a universal activity much broader and more gender inclusive than we normally think today in doing so the philosopher challenges us to reconsider our idea of what philosophers can do and what counts as philosophy

this highly readable volume offers a broad introduction to modern philosophy and philosophers scharfstein contends that personal experience especially that of childhood affects philosophers sense of reality and hence the content of their philosophies basing his argument on biographical studies of twenty great philosophers from descartes to sartre he provides the beginnings of a psychological history of philosophy

in his essais montaigne stresses that his theoretical interest in philosophy goes hand in hand with its practicality in fact he makes it clear that there is little reason to live our lives according to doctrine without proof that others have successfully done so understanding montaigne s philosophical thought therefore means not only studying the philosophies of the great thinkers but also the characters and ways of life of the philosophers themselves the focus of montaigne and the lives of the philosophers life writing and transversality in the essais is how montaigne assembled the lives of the philosophers on the pages of his essais in order to grapple with two fundamental aims of his project first to transform the teaching of moral philosophy and next to experiment with a transverse construction of his self both of these objectives grew out of a dialogue with the structure and content in the life writing of plutarch and diogenes laertius authors whose books were

bestsellers during the essayist's lifetime

nietzsche is undoubtedly one of the most original and influential thinkers in the history of philosophy with ideas such as the overman will to power the eternal recurrence and perspectivism nietzsche challenges us to reconceive how it is that we know and understand the world and what it means to be a human being further in his works he not only grapples with previous great philosophers and their ideas but he also calls into question and redefines what it means to do philosophy nietzsche and the philosophers for the first time sets out to examine explicitly nietzsche's relationship to his most important predecessors this anthology includes essays by many of the leading nietzsche scholars including keith ansell pearson daniel conway tracy b strong gary shapiro babette babich mark anderson and paul s loeb these excellent writers discuss nietzsche's engagement with such figures as plato aristotle kant socrates hume schopenhauer emerson rousseau and the buddha anyone interested in nietzsche or the history of philosophy generally will find much of great interest in this volume
